

HEAT JUNCTION HJ5 CONTROLLER

SAVE ON

Running costs

Chemicals

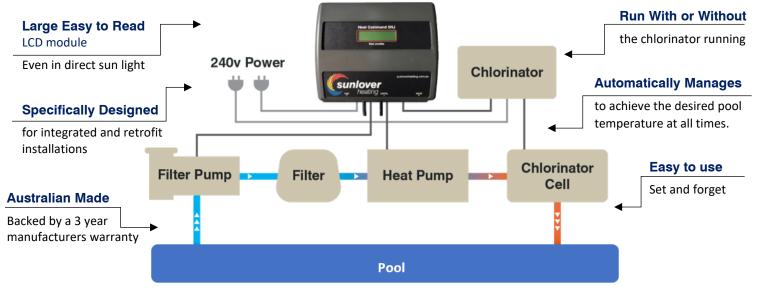

🖌 Installation

 Only one pump required a true one pump system

No electrician required for Set Up

No need for solar provisions

The Heat Junction system is used to avoid over chlorinating the swimming pool, which can often occur when a longer heat up time is required. This allows for a true one pump system to be used with the heater plumbed in line without over chlorinating the pool thus saving time and money.
